

Amazon E-Commerce System Report

Platform Overview: Functional & Non-Functional Analysis

1. INTRODUCTION

Amazon is one of the world's largest e-commerce platforms, founded by Jeff Bezos in 1994. Initially started as an online bookstore, it has expanded into a global marketplace offering a wide range of products including electronics, clothing, groceries, and more.

Amazon provides services such as online shopping, digital streaming, cloud computing (AWS), and online payments. It focuses on customer satisfaction, fast delivery, and reliable services.

2. FUNCTIONAL REQUIREMENTS

Functional requirements describe what the system should do:

User Account Management

Users can register, login, logout, and manage their profile details.

Product Management

Users can view products, search items, and filter based on categories, price, and ratings.

Cart and Order System

Users can add items to cart, remove items, update quantity, and place orders.

Payment System

Supports multiple payment methods such as UPI, cards, net banking, and cash on delivery.

Order Tracking

Users can track their orders and receive real-time delivery updates.

Review and Rating

Customers can provide ratings and reviews for products.

3. NON-FUNCTIONAL REQUIREMENTS

Non-functional requirements describe how the system performs:

Performance

The system should load quickly and handle large numbers of users simultaneously.

Security

Ensures secure transactions and protects user data using encryption.

Scalability

The system should be able to handle growth in users and transactions seamlessly.

Reliability

The system should be available 24/7 with minimal downtime.

Usability

The interface should be user-friendly and accessible across all devices.

Availability

The system should always be accessible to users globally.

4. CONCLUSION

Amazon is a highly efficient and scalable e-commerce platform that combines strong functional features with robust non-functional qualities. Its ability to provide fast, secure, and reliable services makes it one of the leading online marketplaces in the world.
